TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

INDEX, VOLUMES 31–40
1929–1936

	Vol.	Pages
Adams, C. R. On the linear partial q-difference equation of general type	31_2	360–371
—— Note on integro-q-difference equations	31_4	861–867
—— On summability of double series	34_2	215–230
—— The space of functions of bounded variation and certain general spaces	40_3	421–438
Adams, C. R., and Clarkson, J. A. On definitions of bounded variation for functions of two variables	35_4	824–854
—— Properties of functions $f(x, y)$ of bounded variation	36_4	711–730
Agnew, R. P. The behavior of bounds and oscillations of sequences of functions under regular transformations	32_4	669–708
—— The effects of general regular transformations on oscillations of sequences of functions	33_2	411–424
—— On Riesz and Cesàro methods of summability	35_2	532–548
Albert, A. A. A determination of all normal division algebras in sixteen units	31_2	253–260
—— New results in the theory of normal division algebras	32_2	171–195
—— On direct products, cyclic division algebras, and pure Riemann matrices	33_1 33_4	219–234 999
—— On normal division algebras of type R in thirty-six units	33_1	235–243
—— On direct products	33_3	690–711
—— Normal division algebras of degree four over an algebraic field	34_2	363–372
—— On normal simple algebras	34_3	620–625
—— Non-cyclic algebras of degree and exponent four	35_1	112–121
—— Cyclic fields of degree eight	35_4	949–964
—— Normal division algebras over a modular field	36_2	388–394
—— On normal Kummer fields over a non-modular field	36_4	885–892
—— On cyclic fields	37_3	454–462
—— Normal division algebras of degree p^e over F of characteristic p	39_1	183–188
—— Simple algebras of degree p^e over a centrum of characteristic p	40_1	112–126
Albert, A. A., and Hasse, H. A determination of all normal division algebras over an algebraic number field	34_3	722–726

	Vol.	Pages
Ayres, W. L. Concerning the arc-curves and basic sets of a continuous curve, second paper	31_3	595–612
—— On the regular points of a continuum	33_1	252–262
Bamforth, F. R. Surface transformations	32_3	417–450
Bamforth, F. R., and Birkhoff, G. D. Divergent series and singular points of ordinary differential equations	32_1	114–146
Bartky, W., and MacMillan, W. D. Permanent configurations in the problem of four bodies	34_4	838–875
Basye, R. E. Simply connected sets	38_2	341–356
Bateman, H. The k-function, a particular case of the confluent hypergeometric function	33_4	817–831
Beckenbach, E. F., and Radó, T. Subharmonic functions and minimal surfaces	35_3	648–661
—— Subharmonic functions and surfaces of negative curvature	35_3	662–674
Bell, E. T. Certain invariant sequences of polynomials	31_3	405–421
—— Numbers of representations of integers in a certain triad of ternary quadratic forms	32_1	1– 5
—— Analytic functions in the irregular field of all numerical functions	32_4	869–878
—— Singular relations between certain arithmetical functions	33_1	65– 71
—— Arithmetical composition and inversion of functions over classes	33_4	897–933
—— The Latin square, or cyclic, functions	35_3	734–745
—— Polynomial diophantine systems	35_4	903–914
—— On the power series for elliptic functions	36_4	841–852
—— General relations between Bernoulli, Euler, and allied polynomials	38_3	493–500
—— A functional equation in arithmetic	39_3	341–344
Bernstein, B. A. A set of four postulates for Boolean algebra in terms of the "implicative" operation	36_4	876–884
Binney, J. H. An elliptic system of integral equations on summable functions	37_2	254–265
Bird, M. T., Carmichael, R. D., and Martin, W. T. On a classification of integral functions by means of certain invariant point properties	40_3	462–473
Birkhoff, G. Integration of functions with values in a Banach space	38_2	357–378
Birkhoff, G., and Hall, P. On the order of groups of automorphisms	39_3	496–499
Birkhoff, G. D., and Bamforth, F. R. Divergent series and singular points of ordinary differential equations	32_1	114–146

	Vol.	Pages
Black, A. H. Types of involutorial space transformations associated with certain rational curves	34_4	795–810
Bliss, G. A., and Hestenes, M. R. Sufficient conditions for a problem of Mayer in the calculus of variations	35_1	305–326
Boas, R. P. Some theorems on Fourier transforms and conjugate trigonometric integrals	40_2	287–308
Bochner, S. Summation of multiple Fourier series by spherical means	40_2	175–207
Bochner, S., and von Neumann, J. Almost periodic functions in groups, II	37_1	21– 50
Bosanquet, L. S. Some arithmetic means connected with Fourier series	39_2	189–204
Brahana, H. R. Groups $\{S, T\}$ whose commutator subgroups are abelian	35_2	386–396
—— Metabelian groups of order p^{n+m} with commutator subgroups of order p^m	36_4	776–792
—— Note on irreducible quartic congruences	38_2	395–400
Bristow, L. Expansion theory associated with linear differential equations and their regular singular points	33_2	455–474
Brown, A. B. Functional dependence	38_2	379–394
Brown, A. B., and Koopman, B. O. On the covering of analytic loci by complexes	34_2	231–251
—— The Riemann multiple-space and algebroid functions	36_3	618–626
Bullock, R. C. Non-conjugate osculating quadrics of a curve on a surface	35_2	518–531
Burington, R. S. On the equivalence of quadrics in m-affine n-space and its relation to the equivalence of $2m$-pole networks	38_1	163–176
Cairns, S. S. An axiomatic basis for plane geometry	35_1	234–244
—— The generalized theorem of Stokes	40_1	167–174
Calugaréano, G. Les fonctions polygènes comme intégrales d'équations différentielles	31_2	372–378
—— On differential equations admitting polygenic integrals	32_1	110–113
Cameron, R. H. Almost periodic transformations	36_2	276–291
Camp, B. H. The multinomial solid and the chi test	31_1	133–144
Carlitz, L. On Galois fields of certain types	32_3	451–472
—— On abelian fields	35_1	122–136
—— On the representation of a polynomial in a Galois field as the sum of an even number of squares	35_2	397–410
Carmichael, R. D. Systems of linear difference equations and expansions in series of exponential functions	35_1	1– 28
Carmichael, R. D., Martin, W. T., and Bird, M. T. On a		

	Vol.	Pages
classification of integral functions by means of certain invariant point properties	40_3	462–473
Carpenter, A. F. Tetrads of ruled surfaces	31_3	523–528
Carson, J. R. The asymptotic solution of an operational equation	31_4	782–792
Chittenden, E. W. On general topology and the relation of the properties of the class of all continuous functions to the properties of space	31_2	290–321
Chokhate, J. See Shohat, J. A.		
Church, A., and Rosser, J. B. Some properties of conversion	39_3	472–482
Churchill, R. V. On the geometry of the Riemann tensor	34_1	126–152
—— Canonical forms for symmetric linear vector functions in pseudo-euclidean space	34_4	784–794
Clarkson, J. A. Uniformly convex spaces	40_3	396–414
Clarkson, J. A., and Adams, C. R. On definitions of bounded variation for functions of two variables	35_4	824–854
—— Properties of functions $f(x, y)$ of bounded variation	36_4	711–730
Cleveland, C. M. On the existence of acyclic curves satisfying certain conditions with respect to a given continuous curve	33_4	958–978
Coe, C. J. Exterior motion in the restricted problem of three bodies	34_4	811–837
Cook, A. J. Pairs of rectilinear congruences with generators in one-to-one correspondence	32_1	31– 46
Craig, H. V. On parallel displacement in a non-Finsler space	33_1	125–142
Cramlet, C. M. A complete system of tensors of linear homogeneous second-order differential equations	34_3	626–644
Currier, A. E. The variable end point problem of the calculus of variations including a generalization of the classical Jacobi condition	34_3	689–704
—— Proof of the fundamental theorems on second-order cross partial derivatives	35_1	245–253
Curtiss, J. Interpolation in regularly distributed points	38_3	458–473
Cutler, E. H. On the curvatures of a curve in Riemann space	33_4	832–838
—— Frenet formulas for a general subspace of a Riemann space	33_4	839–850
Davis, D. R. Integrals whose extremals are a given $2n$-parameter family of curves	33_1	244–251
Diamond, A. H. The complete existential theory of the Whitehead-Huntington set of postulates for the algebra of logic	35_4	940–948
—— Correction to a paper on the Whitehead-Huntington postulates	36_4	893
Dickson, L. E. Universal quadratic forms	31_1	164–189
—— Constructions of division algebras	32_2	319–334

	Vol.	Pages
—— Waring's problem for cubic functions	36_1	1– 12
—— A new method for Waring theorems with polynomial summands	36_4	731–748
—— Cyclotomy and trinomial congruences	37_3	363–380
—— Cyclotomy when e is composite	38_2	187–200
—— A new method for Waring theorems with polynomial summands, II	39_2	205–208
Doob, J. L. The boundary values of analytic functions	34_1	153–170
—— The boundary values of analytic functions. II	35_2	418–451
—— Probability and statistics	36_4	759–775
—— Statistical estimation	39_3	410–421
Douglas, J. Solution of the problem of Plateau	33_1	263–321
—— One-sided minimal surfaces with a given boundary	34_4	731–756
Dunford, N. Integration in general analysis	37_3	441–453
—— Corrections to the paper "Integration in general analysis"	38_3	600–601
—— Integration and linear operations	40_3	474–494
Dunford, N., and Morse, A. P. Remarks on the preceding paper of James A. Clarkson	40_3	415–420
Dye, L. A. Involutorial transformations in S_3 of order n with an $(n-1)$-fold line	32_2	251–261
Dye, L. A., and Sharpe, F. R. The Bertini transformation in space	36_2	292–305
Earl, J. M. Polynomials of best approximation on an infinite interval	32_4	888–904
Eiesland, J. The ruled V_4^4 in S_5 associated with a Schläfli hexad	36_2	315–326
Emch, A. Triple and multiple systems, their geometric configurations and groups	31_1	25– 42
Engstrom, H. T. On the common index divisors of an algebraic field	32_2	223–237
—— The theorem of Dedekind in the ideal theory of Zolotarev	32_4	879–887
—— On sequences defined by linear recurrence relations	33_1	210–218
Evans, G. C. On potentials of positive mass. Part I	37_2	226–253
—— Potentials of positive mass. II	38_2	201–236
Fejér, L. Trigonometrische Reihen und Potenzreihen mit mehrfach monotoner Koeffizientenfolge	39_1	18– 59
Fekete, M. Some generalizations of Paley's theorems on Fourier series with positive coefficients	38_2	237–249
Feraud, L. On Birkhoff's Pfaffian systems	32_4	817–831
Fialkow, A. Trajectories and lines of force	38_1	89–105
—— Initial motion in fields of force	40_3	495–501
Ford, L. R. The limit points of a group	31_4	821–828
Fort, T. Generalized factorial series	31_2	233–240

	Vol.	Pages
Fréchet, M., and Shohat, J. A proof of the generalized second limit-theorem in the theory of probability	33$_2$ 33$_4$	533–543 999
Gehman, H. M. On extending a continuous (1-1) correspondence (second paper)	31$_2$	241–252
Gergen, J. J. Convergence criteria for double Fourier series	35$_1$	29– 63
Gergen, J. J., and Littauer, S. B. Continuity and summability for double Fourier series	38$_3$	401–435
Geronimus, J. On orthogonal polynomials	33$_1$	322–328
Ghosh, S. On the solution of the equations of elastic equilibrium suitable for elliptic boundaries	32$_1$	47– 60
Gillespie, D. C., and Hurwitz, W. A. On sequences of continuous functions having continuous limits	32$_3$	527–543
Gore, G. D. Inscribed sequences of surfaces associated with generalized sequences of Laplace	36$_3$	530–541
Gourin, E. On irreducible polynomials in several variables which become reducible when the variables are replaced by powers of themselves	32$_3$	485–501
Graustein, W. C. Parallelism and equidistance in classical differential geometry	34$_3$	557–593
—— The geometry of Riemannian spaces	36$_3$	542–585
Graves, L. M. A transformation of the problem of Lagrange in the calculus of variations	35$_3$	675–682
—— The existence of an extremum in problems of Mayer	39$_3$	456–471
Griffin, M. Invariants of Pfaffian systems	35$_4$	929–939
Grove, V. G. Nets with equal W invariants	31$_4$	845–852
—— Contributions to the general theory of transformations of nets	31$_4$	853–860
—— A canonical form of Green's projective analogue of the Gauss differential equations	32$_3$	473–484
—— The transformation E of nets	33$_1$	147–152
—— The transformation C of nets in hyperspace	33$_3$	733–741
—— Contributions to the theory of transformations of nets in a space S_n	35$_3$	683–688
—— On a certain correspondence between surfaces in hyperspace	36$_3$	627–636
—— Differential geometry of a certain type of surface in S_4	39$_1$	60– 70
—— Differential geometry of a surface at a planar point	40$_1$	155–166
Hall, P., and Birkhoff, G. On the order of groups of automorphisms	39$_3$	496–499
Harshbarger, F. The geometric configuration defined by a special algebraic relation of genus four	33$_2$	557–578

Heineman, E. R. Generalized Vandermonde determinants	31_3	464–476
Herzog, F. Systems of algebraic mixed difference equations	37_2	286–300
Hestenes, M. R. Sufficient conditions for the general problem of Mayer with variable end points	35_2	479–490
—— Sufficient conditions for the problem of Bolza in the calculus of variations	36_4	793–818
Hestenes, M. R., and Bliss, G. A. Sufficient conditions for a problem of Mayer in the calculus of variations	35_1	305–326
Hickson, A. O. An application of the calculus of variations to boundary value problems	31_3	563–579
Hildebrandt, T. H. On the interchange of limit and Lebesgue integral for a sequence of functions	33_2	441–443
—— On bounded linear functional operations	36_4	868–875
Hille, E. Notes on linear transformations, I	39_1	131–153
Hille, E., and Tamarkin, J. D. On the summability of Fourier series. I	34_4	757–783
Hinrichsen, J. J. L. On the problem of n bodies	36_2	306–314
Hollcroft, T. R. The general web of algebraic surfaces of order n and the involution defined by it	35_4	855–868
Hopf, E. Theory of measure and invariant integrals	34_2	373–393
—— Fuchsian groups and ergodic theory	39_2	299–314
Hopkins, C. Metabelian groups of order p^m, $p>2$	37_1	161–195
Hotelling, H. The consistency and ultimate distribution of optimum statistics	32_4	847–859
Hull, R. The numbers of solutions of congruences involving only kth powers	34_4	908–937
—— Maximal orders in rational cyclic algebras of odd prime degree	38_3	515–530
—— The maximal orders of generalized quaternion division algebras	40_1	1– 11

	Vol.	Pages
Huntington, E. V. New sets of independent postulates for the algebra of logic, with special reference to Whitehead and Russell's *Principia Mathematica*	35_1	274–304
—— Boolean algebra. A correction	35_2	557–558
—— A second correction	35_4	971
—— Inter-relations among the four principal types of order	38_1	1– 9
Hurwitz, W. A., and Gillespie, D. C. On sequences of continuous functions having continuous limits	32_3	527–543
Hutchinson, J. I. Properties of functions represented by the Dirichlet series $\sum(av+b)^{-s}$, or by linear combinations of such series	31_2	322–344
Ingraham, M. H., and Wegner, K. W. The equivalence of pairs of Hermitian matrices	38_1	145–162
Jackson, D. A note on closest approximation	31_2	215–222
—— Bernstein's theorem and trigonometric approximation	40_2	225–251
James, R. D. The value of the number $g(k)$ in Waring's problem	36_2	395–444
Jeffery, R. L. The integrability of a sequence of functions	33_2	433–440
—— Non-absolutely convergent integrals with respect to functions of bounded variation	34_3	645–675
—— Sets of k-extent in n-dimensional space	35_3	629–647
—— Derived numbers with respect to functions of bounded variation	36_4	749–758
Jessen, B., and Wintner, A. Distribution functions and the Riemann zeta function	38_1	48– 88
Jones, B. W. A new definition of genus for ternary quadratic forms	33_1	92–110
—— The regularity of a genus of positive ternary quadratic forms	33_1	111–124
Kellogg, O. D. On the derivatives of harmonic functions on the boundary	33_2	486–510
—— Converses of Gauss' theorem on the arithmetic mean	36_2	227–242
Ketchum, G. S. On certain generalizations of the Cauchy-Taylor expansion theory	40_2	208–224
Kogbetliantz, E. Contribution à l'étude du saut d'une fonction donnée par son developpement en série d'Hermite ou de Laguerre	38_1	10– 47
Koopman, B. O. On the singularities of linear partial differential equations	31_4	687–693
—— On distributions admitting a sufficient statistic	39_3	399–409
Koopman, B. O., and Brown, A. B. On the covering of analytic loci by complexes	34_2	231–251
—— The Riemann multiple-space and algebroid functions	36_3	618–626

	Vol.	Pages
Lamson, K. W. Some differential and algebraic consequences of the Einstein field equations	32_4	709–722
Lane, E. P. Hypergeodesic mapping of a surface on a plane	32_3	558–568
—— Integral surfaces of pairs of partial differential equations of the third order	32_4	782–793
—— Surfaces and curvilinear congruences	34_3	676–688
—— The moving trihedron	36_3	696–710
—— A canonical power series expansion for a surface	37_3	463–482
Langer, R. E. The boundary problem associated with a differential equation in which the coefficient of the parameter changes sign	31_1	1– 24
—— The asymptotic location of the roots of a certain transcendental equation	31_4	837–844
—— The expansion problem in the theory of ordinary linear differential systems of the second order	31_4	868–906
—— The boundary problem associated with a differential system rational in the parameter	32_2	238–250
—— On the asymptotic solutions of ordinary differential equations, with an application to the Bessel functions of large order	33_1	23– 64
—— On the asymptotic solutions of differential equations, with an application to the Bessel functions of large complex order	34_3	447–480
—— The asymptotic solutions of certain linear ordinary differential equations of the second order	36_1	90–106
—— The solutions of the Mathieu equation with a complex variable and at least one parameter large	36_3	637–695
—— On the asymptotic solutions of ordinary differential equations, with reference to the Stokes' phenomenon about a singular point	37_3	397–416
LaPaz, L. An inverse problem of the calculus of variations for multiple integrals	32_3	509–519
Laporte, O., and Rainich, G. Y. Stereographic parameters and pseudo-minimal hypersurfaces	39_1	154–182
Latimer, C. G. On certain identities in theta functions	32_4	832–846
—— On the class number of a cyclic field	35_2	411–417
—— On ideals in generalized quaternion algebras and Hermitian forms	38_3	436–446
—— On the class number of a quaternion algebra with a negative fundamental number	40_2	318–323
